

SEED RESEARCH OF OREGON

The germination of ideas

FEATURES

- Uniform dark green color
- Excellent mowing quality
- Improved disease resistance
- Broad genetic base
- Uses: Ideal for golf courses, sports fields, lawns and

BENEFITS

- Excellent density and ultra-fine texture
- Durable turf
- Broad range of climatic adaptation

SEEDING RATES

- Seeds/lb: 300,000
- New turf:
7–9 lbs/1,000 sq ft
300–400 lbs/acre
- Overseeding:
6–8 lbs/1,000 sq ft
250–350 lbs/acre
- Winter overseeding:
15–20 lbs/1000 sq ft
650-875 lbs/acre

ESTABLISHMENT

- Quick establishment
- First mowing in 2 weeks
- Playable in 14–21 days from seeding date

CHAMPION® BLUE

PERENNIAL RYEGRASS / BLUEGRASS MIXTURE

Innovation not Imitation

In recent years, the idea of mixing Kentucky bluegrass with perennial ryegrass has gained in popularity. The advantages of mixing these two grasses include: increased winter hardiness, improved wear tolerance, better disease suppression and lower maintenance costs. The addition of superior bluegrass varieties to our excellent perennial ryegrasses helps to ensure long-term performance under varied management and stress conditions.

Improving on the Standard

The improved quality and economy of our latest generation of endophyte enhanced perennial ryegrasses have made them an indispensable part of many golf courses. Their ability to germinate and establish quickly, their tolerance of close mowing, and their broad range of climatic adaptations has made Seed Research of Oregon's Champion® GQ perennial ryegrass blend the workhorse turf for golf courses around the world. Our new SR 4220, SR 4420 and SR 4500 varieties have incredible Grey Leaf Spot resistance, a deep, rich green color, and an unbelievable density.

The newest generations of Kentucky bluegrasses have greatly improved on many of the plagues from which older varieties suffered. Necrotic Ring Spot, scalping at close mowing heights, and susceptibility to drought (and the associated summer dormancy) have been the focus of intense breeding. SR 2284, Arcadia, Odyssey and Showcase Kentucky bluegrasses provide a healthier, denser, and more disease free turf than ever before.

Introducing Champion® Blue

We developed Champion® Blue to incorporate the very best perennial ryegrasses available (including SR 4220, SR 4420, SR 4500 and Hawkeye) with our advanced Kentucky bluegrass varieties (SR 2284, Arcadia, Showcase and Odyssey).
