

## TECHNICAL TURF DATA

### FEATURES

- Quick establishment
- Superior wear tolerance
- Dark green color
- Excellent disease resistance
- Uses: Ideal for golf fairways and roughs, sports fields, parks, commercial landscape and residential lawns

### BENEFITS

- Low maintenance
- Increased resistance to Leaf Spot, Brown Patch, Red Thread and Gray Leaf Spot
- Fine Texture

### SEEDING RATES

- Seeds/lb: 220,000–250,000
- New turf:
  - 7–9 lbs/1,000 sq ft
  - 300–400 lbs/acre
- Winter Overseed Rate
  - Greens:
    - 30 lbs/1,000 sq ft
  - Fairways and Tees:
    - 450–700 lbs/acre
  - Sports fields:
    - 12 lbs/1000 sq ft
    - 550–750 lbs/acre

### ESTABLISHMENT

- Germination: 3–7 days under ideal conditions
- First mowing: 14 days after emergence

**PVP**

Plant Variety Protection

# PLAYMATE

## PERENNIAL RYEGRASS BLEND

**Playmate Perennial Ryegrass blend** is formulated from some of our top proprietary varieties. Playmate has exceptional dark green, fine-textured turf that out performs single varieties alone. From the Mason-Dixon Line North into Southern Canada and from Virginia to California, Playmate out performs the competitors. Playmate is an excellent choice for Southern winter overseeding of dormant bermudagrass.

### Quick Establishment

Perennial Ryegrasses have been known for their rapid germination. Playmate will germinate within six days under ideal seed bed condition. Exceptional seedling vigor will produce excellent color that will be evident several weeks after planting.

### Dark Green Color

The vigor, evident as a seedling, continues to produce a dense dark green carpet. Since Playmate is a blend, the varying maturities of each variety will maintain this dark green color from early Spring well into the cold weather.

### Lower Maintenance

Since Playmate establishes a deep root system, it has increased tolerance to heat and drought. Although it is recommended to irrigate during drought periods, less water will be required.

### Better Disease Resistance

Each variety of Playmate was chosen because of its increased resistance to Leaf Spot, Brown Patch, Red Thread and other plant diseases and insects.

### Fine Texture Cuts Clean and Low

The fine texture of the Playmate varieties can be cut from 1 1/2" to as low as 1/2" in height. This means your playing surface will be smoother, cleaner and more attractive.
